

BRM / XRM Handling and Safety

All Botanical Reference Materials (BRMs) and Extract Reference Materials (XRM) manufactured and distributed by ChromaDex are ingredients for use in dietary supplements and therefore are “foods” regulated under the Federal Food, Drug, and Cosmetic Act. All such ingredients are in compliance with the Federal Food, Drug, and Cosmetic Act and applicable Food and Drug Administration regulations. These products are exempted from the requirement that they bear hazard communications labeling under the Occupational Safety and Health Administration (OSHA) Hazardous Communication Rule, 29 CFR 1910.122(a)(5)(iii).

ChromaDex supplies these materials for use as analytical tools. A Material Safety Data Sheet (MSDS) will only be provided when the product requires known special handling upon receipt.

It should be noted that misuse or inadequate handling of granulated or powdered ingredients could create potentially hazardous conditions. Due to the physical properties of such ingredients, care should be taken to avoid processing methods and handling techniques that results in the formation of dust. If granulated or powdered ingredients are handled in a fashion that creates airborne dust they may, under certain temperature and humidity conditions, be explosive in the presence of an open flame, spark, or other ignition source. Airborne dust resulting may also be an inhalation hazard to persons present in the work area.

Please contact us if you have any additional questions regarding the proper handling and storage of our products.
